

# Analisi dei dati con Excel

# Generalità su Office

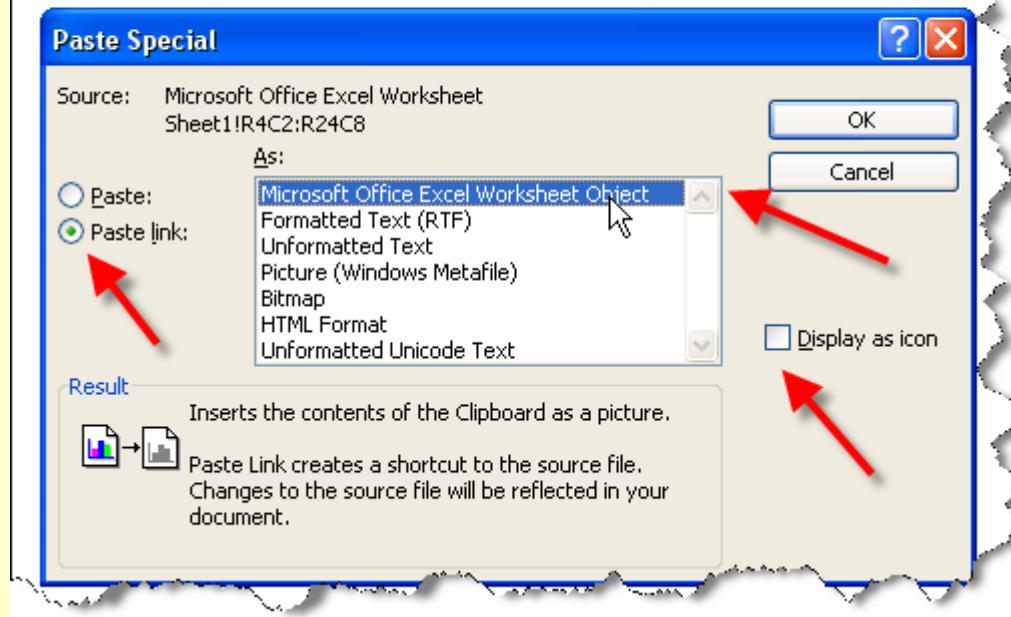

- Gli strumenti di uso comune sono ritagliati su specifiche esigenze, ma si ricopronono funzionalmente
  - Es. Scrivere testi con Excel o gestire tabelle in Word
- Le ricoperture devono essere usate quando la funzione “non è rilevante”
- “Ofelè fa il tò mestè” e cioè : panettiere fai i tuoi mestieri.

# Integrazione

- I vari strumenti permettono di integrare “pezzi” l’uno nell’altro
- Le integrazioni possono essere passive (immagini, testo, ... Ecc) oppure attive, con la possibilità di interagire e di aggiornare “un solo punto”

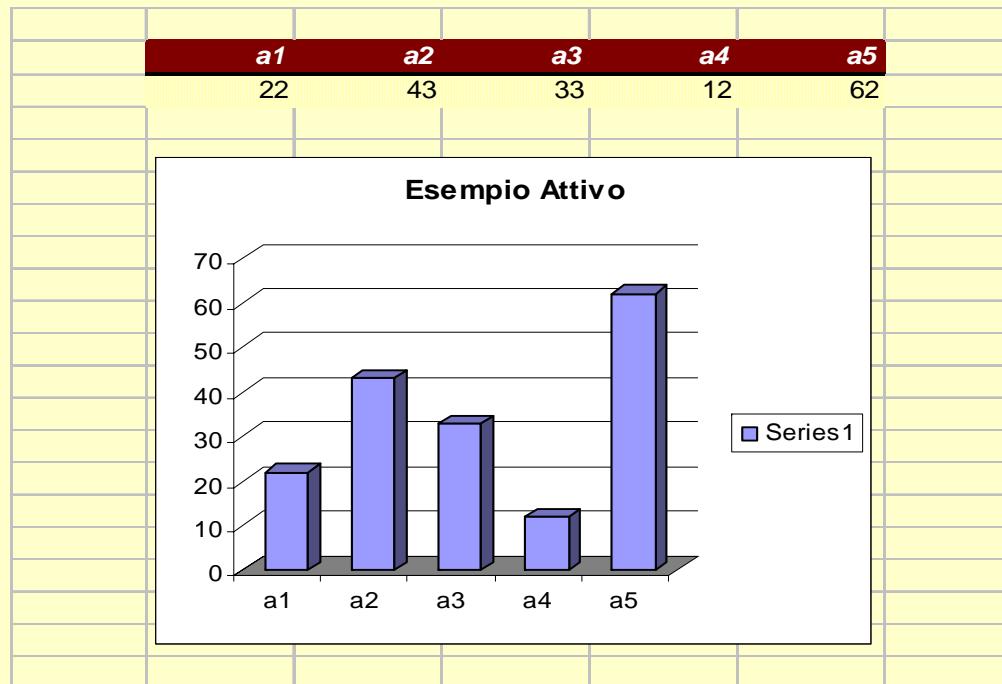

# Link Attivo

## Esempio di inserto attivo

# Excel → Word → Power Point

Esempio di inserto attivo

I due documenti sono legati

# Il foglio elettronico (gli inizi)

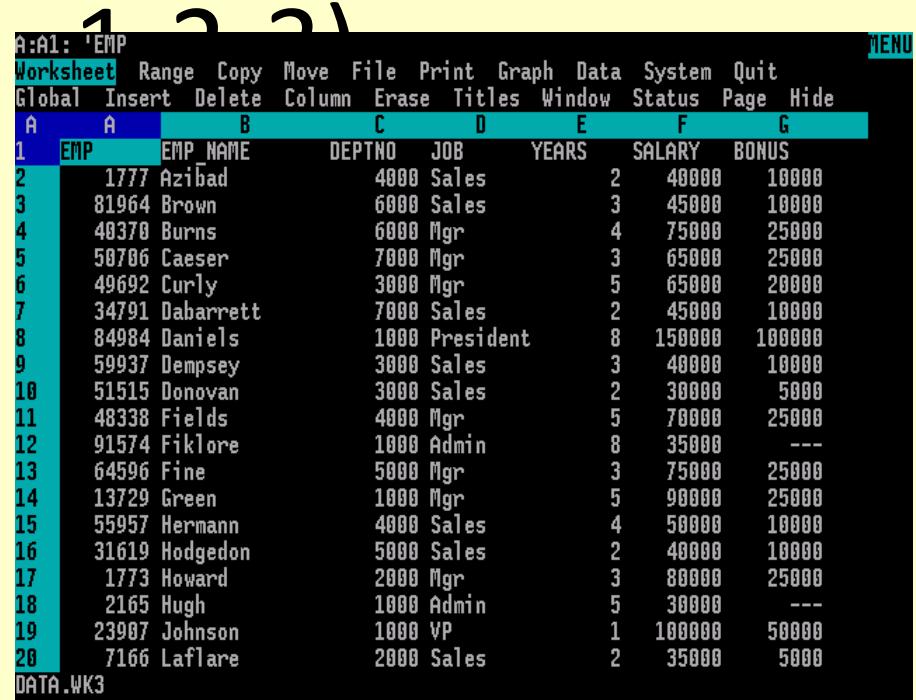

- VisiCalc è il primo foglio elettronico, creato da Dan Bricklin, un giovane studente della Harvard Business School. Il primo prototipo risale al 1978  
(prima non esisteva nulla di simile!)

| C11 (L) TOTAL |           |       |           | R1<br>25 |
|---------------|-----------|-------|-----------|----------|
|               | A ITEM    | B NO. | C UNIT    | D COST   |
| 1             | MUCK RAKE | 43    | 12.95     | 556.85   |
| 2             | BUZZ CUT  | 15    | 6.75      | 101.25   |
| 3             | TOE TONER | 250   | 49.95     | 12487.50 |
| 4             | EYE SNUFF | 2     | 4.95      | 9.90     |
| 5             |           |       |           | -----    |
| 6             |           |       | SUBTOTAL  | 13155.50 |
| 7             |           |       | 9.75% TAX | 1282.66  |
| 8             |           |       | TOTAL     | 14438.16 |
| 9             |           |       |           |          |
| 10            |           |       |           |          |
| 11            |           |       |           |          |
| 12            |           |       |           |          |
| 13            |           |       |           |          |
| 14            |           |       |           |          |
| 15            |           |       |           |          |
| 16            |           |       |           |          |
| 17            |           |       |           |          |
| 18            |           |       |           |          |
| 19            |           |       |           |          |
| 20            |           |       |           |          |

- Dal suo germe nasceranno Supercalc, Lotus 1-2-3, Quattro, Multiplan, Excel

# Il foglio elettronico (Lotus 1-2-3)

- It was the IBM PC's first "killer application"; its huge popularity in the mid-1980s contributed significantly to the success of the IBM PC in the corporate environment
- The Lotus Development Corporation was founded by Mitchell Kapor, a friend of the developers of VisiCalc. 1-2-3 was originally written by Jonathan Sachs, who had written two spreadsheet programs previously while working at Concentric Data Systems, Inc.

The screenshot shows a vintage computer monitor displaying the Lotus 1-2-3 spreadsheet application. The menu bar at the top includes 'A: A1: 'EMP', Worksheet, Range, Copy, Move, File, Print, Graph, Data, System, Quit, Global, Insert, Delete, Column, Erase, Titles, Window, Status, Page, Hide'. The main window displays a grid of data with columns labeled 'EMP', 'EMP NAME', 'DEPTNO', 'JOB', 'YEARS', 'SALARY', and 'BONUS'. The data consists of 20 rows of employee information, such as Azibad (Dept 4000, Sales), Brown (Dept 6000, Sales), Burns (Dept 6000, Mgr), and so on. The bottom of the screen shows 'DATA.WK3'.

| A  | A     | B         | C      | D         | E     | F      | G      |
|----|-------|-----------|--------|-----------|-------|--------|--------|
| 1  | EMP   | EMP NAME  | DEPTNO | JOB       | YEARS | SALARY | BONUS  |
| 2  | 1777  | Azibad    | 4000   | Sales     | 2     | 40000  | 10000  |
| 3  | 81964 | Brown     | 6000   | Sales     | 3     | 45000  | 10000  |
| 4  | 40370 | Burns     | 6000   | Mgr       | 4     | 75000  | 25000  |
| 5  | 50706 | Caeser    | 7000   | Mgr       | 3     | 65000  | 25000  |

**Lotus 1-2-3 was the very first computer software to use television consumer advertising.** 1-2-3 was released on January 26, 1983, started outselling then-most-popular VisiCalc the very same year, and for a number of years was the leading spreadsheet for the DOS operating system.

# Bill Gates “sostiene” Excel

E quindi .... Ora c'è solo Excel

oppure.... OpenOffice.org\_Calc
